# FP30

WOODBURNING FIREPLACE

## FLOATING FIREBOX

Pacific Energy's unique floating firebox components allow for unrestricted thermal expansion and contraction, reducing metal fatigue and ultimately resulting in a quieter operation.

## AIR WASH SYSTEM

What good is a beautiful wood fire if you can't see it? Pacific Energy's unrivalled Air Wash System keeps your fireplace glass clean and clear even at low burn settings.

## QUADRANT

The Pacific FP30's user friendly one-touch air adjustment allows for simple operation to optimize heat output and efficient burn times.

## INTRODUCING THE PACIFIC FP30

The perfect blend of Pacific Energy's legendary wood heat performance with the functionality of a built-in fireplace and contemporary design.

## CONVECTION AIR

Efficiently heat spaces up to 3000 sq. feet

## 6" CHIMNEY

## BAFFLE

Fully seam welded, the 304 grade stainless steel integrated baffle system uses 10 times more stainless than tube technology, allowing for cleaner, longer burns and a secondary burn combustion system that turns smoke to energy.

## EBT2

Pacific Energy's second generation Extended Burn Technology is a first in wood heat engineering. The automated adjusting airflow control system creates a stable, consistent combustion chamber airflow resulting in temperatures that will burn fuel longer and substantially lower your heating costs.

## FAN

With a dual outlet, the 125 CFM convection fan quietly and effectively moves air through the unit to the convection air terminal.

## AIR INTAKE DUCT

Located on either side of the unit for maximum installation options, the multi position air intake duct is easily adjustable to suit most applications.

WOODBURNING FIREPLACE

## STANDARD FEATURES

- Reliable non-catalytic technology
- Extended burn technology
- User friendly one-touch operation
- Air wash system for super clean ceramic glass
- High-tech multi port combustion air injection system
- Inside and outside combustion air capable
- Floating firebox for extended life
- Easy and safe front to back fuel loading
- Cast iron door and ash lip
- 304 Stainless Steel Baffle, insulation cover, rails, and flame shield
- Boost air for easy lighting
- 125 cfm temperature actuated variable speed blower

## OPTIONS

Heat Transfer Kit to run heat ducts to various other rooms creating a warm, cozy atmosphere throughout your home

Backed by the best in the industry - Pacific Energy's Limited Lifetime Warranty

Heat Output Cord Wood

# 99,000 BTU

38,500 BTU EPA Test Fuel

Efficiency (LHV)	74%
Emissions	2.68 gm/hr.
Log Size (max)	18-20 inches
Firebox Size	3.0 Cubic Ft.

## UNIT DIMENSIONS

## MINIMUM FRAMING DIMENSIONS\*
